how long does it take for one person to evolve?

on Jan 1, 2011 the age of the earth = 4.54×10^9 years

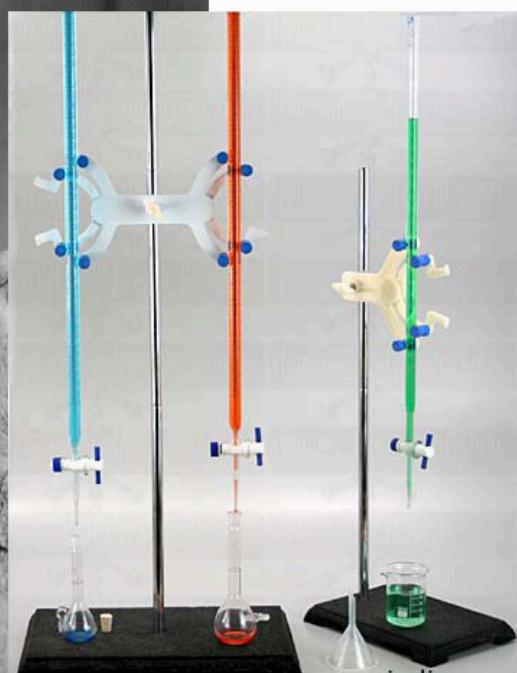

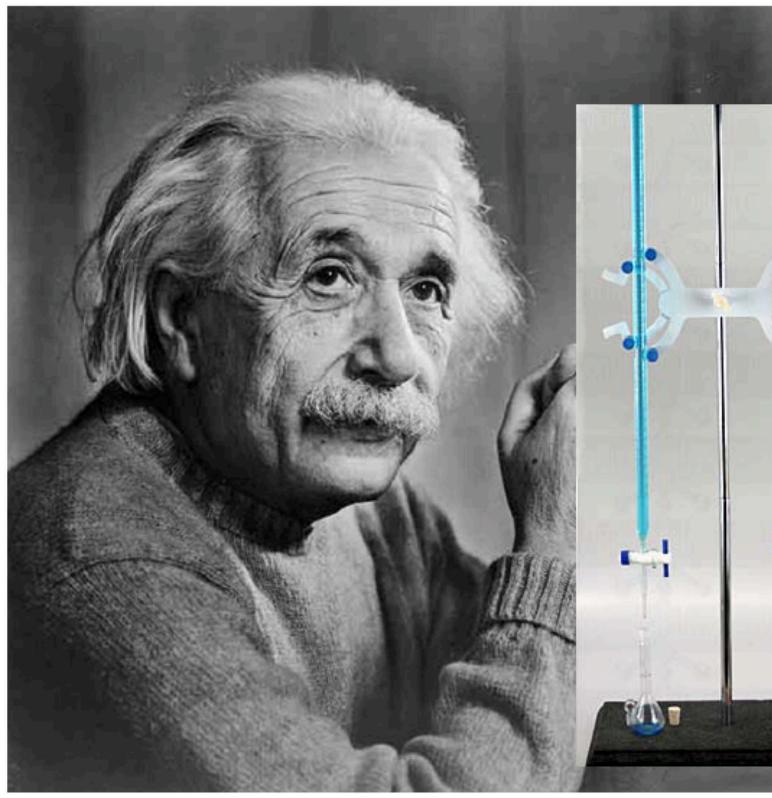

on Jan 1, 2011 the world population = 6.88×10^9 humans

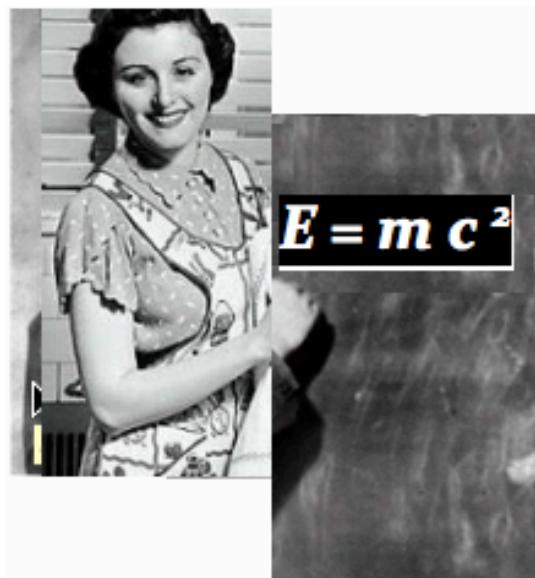

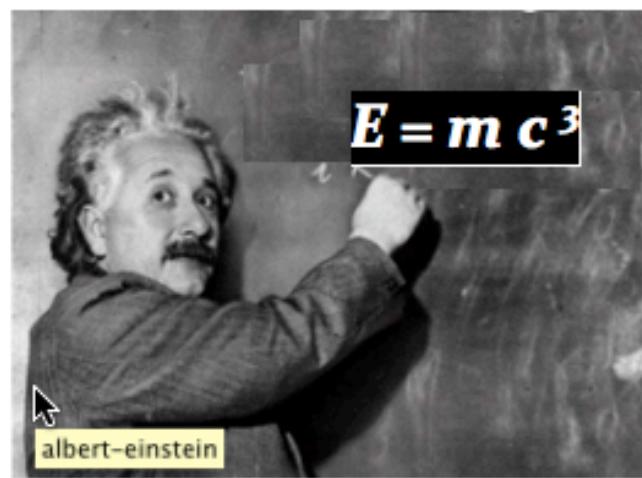

so it takes an average of 4.54×10^9 years/ 6.88×10^9 humans = 0.66 years for one person to evolve

The Finches' neighbor, Miss Maudie Atkinson, "happens" to be at breakfast for Scout's first day of school and of wearing a dress.

That event provided an (all too infrequent) plausible reason for Maudie to be there so early, and she had blissfully been able to stay the entire previous night.

Normally, Atticus would need to distract the children to allow Maudie to sneak out after he had "damn well" had his way with her.
